

ABOUT ARMCOM

ARMCOM is one of the leading export, processing and producer groups in Pakistan. For several years, we have been serving the food and nutritional industry with quality ingredients, on time shipments and customer satisfaction. We specialize in Organic and Conventional Sesame Seeds, Rice, Dates, Rice Flour and Himalayan Pink Salt.

ORGANIC AND CONVENTIONAL SESAME SEEDS

Sesame is a flowering plant in the genus *Sesamum*. Sesame has one of the highest oil contents of any seed. With a rich, nutty flavor, it is a common ingredient in cuisines around the world. We offer sesame seeds in 25 kg paper bags and 750 kg jumbo bags.

ORGANIC AND CONVENTIONAL DATES

Dates, the delectable fruit that graces our tables, are a true gift from nature. Originating from the date palm tree, these sweet gems thrive in the warm climates of regions like Pakistan, making it one of the top five leading date exporting countries globally. We offer packaging of 10 kg per carton and 1800 carton per 20' FCL.

HIMALAYAN PINK SALT

The Himalayan Pink Salt is believed to be the purest form of salt. Known for its high mineral content and its therapeutic properties. When used in moderation, salt can be a healthy addition to your diet. Himalayan pink salt benefits include improving respiratory problems, balancing PH levels and aiding in digestion.

VACUUM PACKAGING

Vacuum packaging is a modern and efficient method of preserving and storing various types of products. This technique involves removing the air from the packaging before sealing it, creating a vacuum environment, to ensure no bacteria or fungi can penetrate and survive in the product. The benefits of vacuum packaging ensure longer shelf life and require less space for storage.

MACHINERY AND EQUIPMENT

We strongly believe in the production of our products to ensure the best quality for our customers. With this objective, we have year after year expanded our production capabilities by embracing cutting edge machinery and equipment. ARMCOM not only enhances the efficiency of our manufacturing operations but also guarantees the precision and excellence that our customers expect.

COLOR SORTER

Our cutting edge high speed color sorter plays a crucial role in efficiently sorting our commodities, guaranteeing the highest quality for our customers. The advanced sorting process is enhanced by a remote controlled AI system, achieving a precision level close to 99.999%. At ARMCOM, we exclusively employ state of the art machinery to ensure optimal quality and consistency in our products.

METAL DETECTOR

Our processing lines are equipped with a comprehensive metal detection system designed to ensure the quality of our products. The system comprises several magnets strategically placed along the sorting lines for the initial removal of ferrous metals. Additionally, we have metal detectors operating at the end of the processing lines, capable of detecting ferrous, non-ferrous, and stainless steel particles.

CORPORATE SOCIAL RESPONSIBILITY

At ARMCOM, Corporate Social Responsibility (CSR) is integral to our business philosophy, recognizing the global impact of our operations in the commodities industry. Committed to ethical practices and sustainable growth, we seamlessly integrate CSR into our operations. Collaborating with NGOs, our initiatives include building schools, providing hospital equipment and placing a particular emphasis on fostering farmer sustainability. We take pride in actively working towards the long term well being and resilience of our farming communities.
