About us

ARMCOM

ARMCOM is one of the leading export, processing and producer groups in Pakistan. For several years, we have been serving the food and nutritional industry with quality ingredients, on time shipments and customer satisfaction. We specialize in Organic and Conventional **Sesame Seeds, Rice, Rice Flour, Dates** and **Himalayan Pink Salt**.

Why Choose ARMCOM?

At ARMCOM, we believe that quality is not just a product feature – it's a promise. Our operations are built around strict sourcing protocols, advanced processing technology and global certifications such as FSSC, ISO 9001, HACCP, Organic, Kosher, SMETA, Halal and FDA-compliant procedures. From field to final shipment, every step is designed to meet international standards and exceed client expectations.

Our Vision And Mission

Our vision is to connect Pakistan's finest agricultural products with global markets through integrity, transparency, and service excellence. We are committed to building long-term partnerships by delivering consistent quality, sustainable sourcing and tailored solutions for every client's unique market needs.

SESAME SEEDS

ORGANIC AND CONVENTIONAL

Sesame is a flowering plant in the genus *Sesamum*. Sesame has one of the highest oil contents of any seed. With a rich nutty flavor, it is a common ingredient in cuisines around the world.

Organic/Conventional Hulled Sesame Seeds

Hulled sesame seeds have their outer shell removed, giving them a lighter color, smoother texture, and delicate, nutty flavor for versatile culinary use.

Organic/Conventional Natural Sesame Seeds

Natural sesame seeds are sourced from sesame plants cultivated through both organic and conventional farming methods. These seeds remain unprocessed, with their outer shells intact.

Organic/Conventional Hulled Roasted Sesame Seeds

Hulled roasted sesame seeds are sourced from sesame plants grown using both organic and conventional methods and undergo a careful roasting process to enhance their flavor and aroma.

Organic/Conventional Natural Roasted Sesame Seeds

Natural roasted sesame seeds are sourced from sesame plants cultivated using both organic and conventional methods and are roasted to enhance their flavor and texture.

Organic and Conventional Natural Sesame Seeds	
Color:	Light-Yellow to Brown

Organic and Conventional Hulled Sesame Seeds	
Color:	Light-Yellow to Golden Brown
Purity:	99.98% minimum
Admixture:	0.02%
Moisture:	6% maximum
FFA:	1.5% maximum
Oil Content:	48% minimum
Packing:	25 Kg Paper Bags & 700 Kg Jumbo Bags

RICE

ORGANIC AND CONVENTIONAL

We have an entire scope of natural rice to supply to our clients including Organic Basmati, Long Grain, Round Grain, Broken Rice and Infant Safe Rice. All rice varieties are available as white or brown. We offer all types in 25kg Paper bags or 1000 kg Jumbo Bags.

Organic Basmati White/Brown Rice

Basmati rice is widely acclaimed for its stunning scent, finely blended parts, smooth fragrance and its taste.

Organic Long Grain White/Brown Rice

Organic long-grain rice length is quite a bit longer than typical rice. At the point when cooked, this grain is light in weight and isolated without any problem.

Organic Round Rice

A comparative assortment to the Italian Arborio rice, our Organic Round Rice is straightforwardly from the Himalayan Mountains.

Organic Long Grain Broken White Rice

Organic long grain broken white rice is found through processing and milling, the Broken's are used for manufacturing purposes such as Flour, Starch & Sweeteners.

Additionally, it is gluten-free, making it suitable for individuals with gluten sensitivities or celiac disease.

RICE FLOUR

ORGANIC AND CONVENTIONAL

Rice flour advances solid blood stream and assimilation of calcium and our rice is high in manganese, iron and protein. ARMCOM deals in different qualities such as coarse, medium, fine and ultra fine grades of Rice flour. We offer all types in 25kg Paper bags or 750 kg Jumbo Bags.

White Rice Flour Organic & Conventional

ARMCOM'S white rice flour is produced organically with a fine consistency. It is very rich in flavor and gives a very neutral and mild taste to the tongue.

Brown Rice Flour Organic & Conventional

ARMCOM'S brown rice flour is another source of producing healthy food. It is the first priority for every dietitian.

HIMALAYAN PINK SALT

The Himalayan Pink Salt is believed to be the purest form of salt.

Pink Himalayan Salt Fine

Pink Himalayan salt fine refers to a finely ground form of pink Himalayan salt, which is a type of rock salt mined from the Khewra Salt Mine in the Himalayan region of Pakistan.

Pink Himalayan Salt Coarse

Pink Himalayan salt coarse, on the other hand, is often used as a finishing salt or for presentation purposes. The larger grains provide a pleasing visual appeal and a satisfying crunch.

Item Quality	Specification highlights	Packaging
Himalayan Light Pink Salt	0.5-0.9 mm, 1-2 mm, 2-5 mm, 5-8 mm	10/25 kgs bags
Himalayan Dark Pink Salt	0.5-0.9 mm, 1-2 mm, 2-5 mm, 5-8 mm	10/25 kgs bags
Black Lava Salt	0.5-0.9 mm, 1-2 mm, 2-5 mm,	10/25 kgs bags

DATES

ORGANIC AND CONVENTIONAL

Dates are grown on palm trees and Pakistan comes in the top five date-exporting countries in the world. Dates are chewy and sweet in texture and taste. ARMCOM deals with the best range of dates to export with the finest quality available worldwide.

Organic Pitted Dates GAQ

Pitted dates are a nutrient-dense food. They are a good source of dietary fiber, natural sugars (predominantly fructose) and essential minerals such as potassium, magnesium and iron.

Organic Pitted Dates FAQ

Pitted dates offer several health benefits. The high fiber content promotes digestive health, helps regulate blood sugar levels and aids in preventing constipation.

Organic Pitted Dates Industrial

Pitted dates are incredibly versatile in the kitchen. They can be eaten on their own as a snack or used as an ingredient in a wide range of recipes. They are commonly used in baking to add natural sweetness and moisture to cakes, cookies and energy bars.

Diced Dates/ Chopped Dates

These dates are harvested, sorted, washed, dried, chopped at origin to a nominal size of 8-10mm (irregular dice) and rolled in rice flour to assist handling. No artificial colours or preservatives are added, so all the nutrients and goodness in the dates are preserved. There also good sources of vitamins, potassium and fibre

PACKAGINGS

PACKAGING

Vacuum Packaging

Vacuum packaging is a modern and efficient method of preserving and storing various types of products. This technique involves removing the air from the packaging before sealing it, creating a vacuum environment, to ensure no bacteria or fungi can penetrate and survive in the product. The benefits of vacuum packaging ensure longer shelf life and require less space for storage.

Jumbo & Paper Bags

Our Jumbo Vacuum Bags with CO₂ technology are designed to protect and preserve your products by creating a controlled, oxygen-free environment. By displacing oxygen with carbon dioxide, these bags help extend shelf life, maintain freshness and safeguard product quality.

Available in 25 kg paper bags, they are ideal for bulk storage, easy handling, and long-lasting protection—making them the perfect solution for industries that value efficiency, safety and durability.

CERTIFICATIONS

We are certified by globally recognized bodies to ensure the highest standards in quality, safety and exports. Our certifications reflect our commitment to excellence and trust in every shipment.

3rd PARTY INSPECTIONS

All our products undergo third-party inspections by globally recognized organizations such as SGS, Eurofins and Bureau Veritas ensuring uncompromised quality and compliance.

LAB ANALYSIS

We partner with renowned labs such as Galab, Eurofins and SGS to ensure consistent quality and safety. Every product is tested to meet global export standards.

MACHINERY AND EQUIPMENT

COLOR SORTER

Our cutting edge high speed color sorter plays a crucial role in efficiently sorting our commodities, guaranteeing the highest quality for our customers. The advanced sorting process is enhanced by a remote controlled AI system, achieving a precision level close to 99.99% at ARMCOM, we exclusively employ state of the art machinery to ensure optimal quality and consistency in our products.

METAL DETECTOR

Our processing lines are equipped with a comprehensive metal detection system designed to ensure the quality of our products. The system comprises several magnets strategically placed along the sorting lines for the initial removal of ferrous metals. Additionally, we have metal detectors operating at the end of the processing lines, capable of detecting ferrous, non-ferrous and stainless steel particles.

CORPORATE SOCIAL RESPONSIBILITY

As part of our commitment to sustainability, ARMCOM has installed a 500 kilo watt solar energy unit at our facility. This system fully supports our electricity needs, enabling us to operate efficiently while reducing our carbon footprint. By generating clean energy on-site, we take pride in playing our part toward a greener future and setting a benchmark for responsible manufacturing.

CSR at ARMCOM - Growing Communities, Nurturing Futures
At ARMCOM, we care for people and the planet. We support farmers with training and eco-friendly practices for sustainable farming. We also partner with Indus Hospital and Chiniot General Hospital to provide healthcare and education to those in need.

Healthy farms, healthy people, stronger future.
